North Terrace Adelaide SA
7-9 April 2010

ANZMapS invites you to join us in Adelaide, for our 2010 Conference programme

Wednesday 7 April – Friday 9 April 2010: State Library of South Australia

Mapping Climate: an Environment for Change is the second annual conference of the Australian and New Zealand Map Society. ANZMapS was formed last year by the amalgamation of the Australian Map Circle and the New Zealand Map Society.

The conference is being held on 7-9 April 2010 at the State Library of South Australia. The Library is located on North Terrace, adjacent to the South Australian Museum of Natural History, the South Australian Art Gallery and to the campuses of University of Adelaide and University of South Australia. It is within easy walking distance of the retail and commercial centre of Adelaide, the beautiful Botanic Gardens and the National Wine Centre.

The conference will be opened by the **Hon Dr John Bannon AO**, the former South Australian Premier and a leading Australian historian. The session on Thursday 8 April will be opened by **Dr Rob Allan**, from the UK Meteorological Office, who is coordinating an international effort (ACRE) to capture climate related information from historical documents. Leading Australian and international cartographers, historians, and scientists are participating.

Besides its topical relevance, the conference theme acknowledges South Australia's exceptional contribution to the analysis of climate and its implications for settlement and development, a history that goes back to the time of South Australian Surveyor-General, George Woodroffe Goyder. Speakers will outline the latest mapping and data analysis technologies; explore the history of climate mapping including the seminal work of Mr Goyder, and outline the relevance of historical records for assessing climate variability today.

Specially organised tours of some of Adelaide's truly exceptional collections of rare maps will take place on the morning of 9 April.
